- LED-backlit graphics
- Accommodates multiple beverage including coffee, juices and teas

# NitroPro Mini

## Beverage Dispenser

*Selling Guide*

Over 60 percent of coffee cups consumed now are considered to be “gourmet or specialty” and cold brew coffee is expected to grow 27% year over year. NitroPro Mini offers an all-in-one refrigerated dispense solution allowing both nitro infused and still products. Draw customers to your stores with specialty drinks with Cornelius NitroPro Mini.

### Proprietary Integrated Nitro Technology

Tank-free nitro generator delivers smooth and creamy, long-lasting cascade without the cost and hassle of extra equipment.

### Simple Bag-in-box Technology

No manual mixing, no filling— just connect the bag-in-box and serve. Adjustable-ratio automatic mixing at the flip of a switch offers operational simplicity and product consistency.

### Frost-free Refrigeration

Safely supports ambient or aseptic concentrate bag-in-box liquid packaging. Consistently colder drinks than the competition cup after cup.

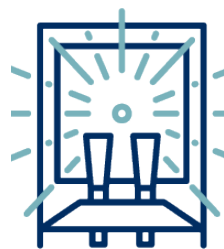

### Versatile Dual Tap Design

Dispense chilled nitro and cold beverages in one dispenser. In fact, this dispenser accommodates multiple beverage formats, including juices, teas and lemonades.

### Simple, Self-Contained Design

Robust design and reliable controls in a simple, self-contained, small footprint. Modular design for ease of service. Requires only water and electrical connections.

### Attention Capturing Graphics

LED-backlit graphics grab customers attention and increase demand for premium drinks. Showcase your brand using custom graphics and taps which are easily changed without tools.
