Obtaining + Installing the Latest IDC Pro Software

Required Tools: USB flash drive including the latest software file.

To access the latest software file, go to the bottom of www.newproducts-cornelius.com/resources, select the box to download the software, and then save the file to a USB flash drive.

Obtaining Latest Software

Download the latest software from the resources page of the IDC Pro website to a USB flash drive.

Insert USB

On the back of the digital merchandiser, unplug the black USB connection and plug in your USB flash drive containing the software update file.

Access Service Screen

Tap each corner of the merchandiser screen in a counterclockwise direction, starting in the upper right corner to form a "C."

Type Service Pin

Type in your passcode to access the Service menu. The default passcode to access the entire service menu is "2222" which will be yours unless you have changed it.

View Service Screen

Select the “**Update Software**” button.

Software Update Screen

In the Software Updater screen, select the “**Update Software**” button.

Update Software

The IDC Pro will recognize the software file from your inserted USB flash drive. Ensure the software file on the left of the screen is selected and highlighted in blue.

Select the “**Install Software**” button to start the installation. Once installed, select “**Back**” to return to the previous screen.

Restart Refresh

Select the “**Restart Refresh**” button to restart the unit and apply the software update.

Use Current Settings

After restarting the IDC Pro, the IDC Pro Configuration screen will appear. Select the gold “**Use Current Settings**” icon.
