December 6th, 2018

Dear Valued Partners,

Cornelius will be implementing a universal barrel seal on all Viper equipment starting with serial number **62D1849VP019** (Year 2018, Week 49.)

This new seal will be blue (Part #620067617) rather than formerly supplied black seals (Part #620043064) or grey seals (Part #620047179.) The blue seal is backwards compatible and can be used in any existing Viper unit.

Blue seals are able to be used for 12 months prior to replacing during scheduled preventive maintenance. Note, the former black and grey seals must be replaced every 6 months during scheduled maintenance.

Viper manuals will be updated reflecting these changes. Manuals will also be updated to communicate scheduled preventive maintenance will be extended to 12 months for all scheduled PM replacement parts, excluded caged O-rings on units with motorman valves. Motorman valve caged O-rings must still be replaced every 6 months for adequate operation.

Replacement blue seals may be ordered directly from 3wire.

Sincerely,
Cornelius Frozen Team
