

MILLENIUM II 6000

6 FLAVOR POST-MIX
JUICE DISPENSER

FEATURES

Selection – Six product selections plus chilled water

Compatibility – For use with closed container (BIB) juice packaging

Quality – Unique mixing valve and nozzle provide a quality drink on every dispense, over a wide range of juice/drink concentrates

Consistency – Large capacity ice bank increases draw capacity, consistently pouring a cold drink

Control – Solid state ice bank control

Ease-of-use – Easy-to-adjust mixing system controls and maintains a consistent finished drink

Contemporary – Available with new contemporary cabinet design which is a blend of attractive black plastic and sturdy stainless steel

Self-contained – Completely self contained pumping system. No additional pumps or air supply needed

Merchandising – Lighted merchandiser is standard

Dispensing options – Push button or programmable portion controlled dispensing available
