

FLAVOR FUSION RATIO CHECK

KIT P/N 620051022

1. Remove the outer nozzle by rotating it to the left and pulling down.

2. Replace with the Splitter Nozzle by pushing up and rotating right.

3. Insert the S tube into the Splitter Nozzle on the syrup tube you want to ratio.

4. Press the appropriate button until syrup comes out of the S tube.

5. Place the ratio cup under the nozzle so the water and syrup flow into the appropriate sections of the ratio cup.
Check with your syrup supplier for proper ratios of each of their syrups.
6. Without stopping, fill the cup until the water is within the ratio window. Tap on counter 3 times, and place on level surface and read immediately.
