Selling Guide

TOUCHLESS

Revive your beverage program by upgrading your self-serve stations to touchless.

Now more than ever, consumers are demanding safe, contact-free dining experiences. Cornelius is proud to introduce our new, easy to operate touchless beverage and ice dispensers. Bonus, no need to buy new – simply upgrade your existing equipment.

- Easy to use, control and understand
- No brixing required when upgrading existing valves
- Supports all ice types
- Turnkey feature for easy cleaning
- ADA compliant

Touchless

Touchless Beverage & Ice Dispensing

Compatible with Enduro Ice and Drink Combo and Ice Only Equipment with SFV1, UFB or UFI Valves

Selling Guide

In today's foodservice environment, **reducing the number of consumer touch-points is top of mind and challenges current foodservice self-serve stations.** Owners and operators require solutions that help keep consumers safe while reducing the risk of surface contact. **Revive your beverage program by upgrading your self-serve stations with the innovative touchless valve.**

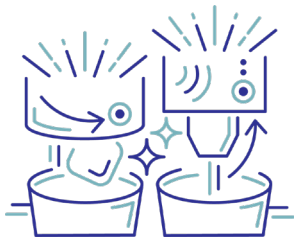

Ease of Use

The touchless valve has **cup sensing technology with indicator levels** that make it easy for customers and crew to **single-handedly dispense any size beverage.**

Easy to Control

Enhanced pour features allow for **faster response times and top-off capabilities with immediate shut-off.** Avoid messy spills and wasting product without touching the equipment.

Intuitive LED Dispensing Visual Cues

No training needed; our new LED indicators offer **intuitive visual dispensing cues** to equipment that most operators are already familiar with.

Easy to Clean

Quickly and confidently **clean your equipment without messy soda overflow with the turn of a key.** A fail-safe **secondary sensor switch for keyless staff** defaults back to dispense mode after 60 seconds.

Accommodates all ice types

Touchless ice dispense supports **all ice types and a variety of cup types* (up to 52 oz)**

Upgrade existing equipment

No need to buy new equipment, simply upgrade to touchless for existing SFV1, UFB and UFI valves. **No bruxing required.**

*Excluding glass cups
